

WALK WITH A SCIENTIST PROGRAMME

Walk with a Scientist Programme was initiated by the Department of Chemistry in the year 2017. In this innovative programme eminent scientists from the country as well as abroad will give a lecture on their respective areas of research and also interact with the students. This creates a forum for students to meet with these eminent personalities in close surroundings, hear about experiences in the modern research and the life stories of these famous personalities. The 2018 interaction was with Dr. Werner Mormann from Germany. He discussed about his research, culture of Germany and his journey through his life. 90 students from the Department of Chemistry attended the program.
