

## **CRAFTING PAPER PENS AND PAPER BAGS**

Workshops and Seminars on making paper pens and paper bags using waste paper empower students with a practical and economic skill. Various departments of the college such as Chemistry and Botany have organized numerous seminars and workshops on sustainability. These sessions bring eminent personalities as speakers and facilitators, providing a growing space for discussions on sustainability and resource conservation. The skills procured in these sessions are used by students to produce paper pens and paper bags, with the former often instilled with a seed that can be grown once the ink runs out. Such thoughtful ideas help in bringing sustainable awareness to entrepreneurship as well. 67 students and 5 faculty members of the College were part of this workshop.
